***Election/Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-8, drawn to a process of making a three-dimensional object.

Group II, claim(s) 9-17, drawn to an apparatus for making a three-dimensional object.

2. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Benda et al (U.S. Patent 5,393,482 A) and Otsuka et al (U.S. Patent 5,985,204 A) disclose, suggest or teach two or more fusion zones. Therefore, since the limitations of claims 1-17 fail to define a contribution over Benda et al and Otsuka et al, they fail to constitute a special technical feature and hence, there is lack of unity between the cited claims.

3. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction

Art Unit: 1791

requirement, the election shall be treated as an election without traverse.
